

DATA-DRIVEN INVESTIGATION OF THE INDIAN EDTECH MARKET

Market Research & Data Analytics Report

1

PREPARED BY

Simran Kumari

2

ASSESSMENT

Data Analyst Internship - Assessment Task 3

3

SUBMISSION DATE

1 October 2026

Tools Used: Microsoft Excel | Power Query | Power BI

2. INTRODUCTION

India's EdTech landscape includes digital learning platforms, technology-enabled teaching, online coaching, and tools that support students, parents and teachers. To understand it, we need to look at the reported benefits, such as learning support and access to educational resources, and also at the concerns around digital access, online safety, advertising practices and consumer protection.

This project looks at a set of 34 research records collected from the sources listed in the Excel workbook. The cleaned dataset organises each record by date, source platform, EdTech platform, category, description, sentiment, evidence status, region, link, quantitative metric and notes. The records cover learning benefits, parent support, teacher experience, smartphone and internet access, EdTech adoption, generative AI use, digital learning risks, misleading advertisements, student refund complaints and regulatory action in the coaching sector.

The purpose of this report is to put the collected evidence in order, find patterns in it, and show the results through Excel analysis and Power BI visuals. All figures are values reported by the cited sources. They are not independently verified, and they do not represent the whole Indian EdTech market.

SCOPE AT A GLANCE

- 34** research records collected
- 4** source groups: research, government, regulator and consumer protection
- 3** tools: Excel, Power Query and Power BI

RESEARCH FOCUS

- Learning benefits and parent support
- Access and infrastructure
- EdTech adoption and usage
- AI and technology
- Digital learning risks
- Consumer protection and regulation

3. PROJECT OBJECTIVES

The Indian EdTech market has grown quickly in recent years because of more digital adoption, government initiatives and the demand for flexible and accessible learning. This growth has also brought concerns such as regulation, data privacy, misleading advertisements and the need for better consumer protection.

The objective of this project was to study the Indian EdTech market using research, survey and regulatory data, with a focus on adoption, technology, benefits, risks and consumer protection.

KEY OBJECTIVES

01

Understand market trends

To look at the current trends in the Indian EdTech market using research and data sources.

02

Identify key themes

To find and group the main themes: technology adoption, accessibility, infrastructure, benefits, risks and consumer protection.

03

Assess evidence and sentiment

To review the collected data and check the sentiment and type of evidence for each part of the EdTech ecosystem.

04

Visualise findings

To present the analysis through Excel PivotTables and an interactive Power BI dashboard.

05

Highlight risks and consumer protection

To point out the risks in the market and the consumer protection steps reported by the regulators.

i

IN SHORT

This project aims to give a data-based understanding of the Indian EdTech market, so that growth, transparency and consumer safety can be discussed with evidence.

4. DATA SOURCES & METHOD

This project uses a set of 34 records about the Indian EdTech landscape. The information was organised in Excel with source names, platform or topic labels, descriptions, evidence status, region, source links, quantitative metrics and notes.

ChatGPT was used as an AI-assisted research and organising aid, to help find, summarise and structure the information and the source references. The workbook records the links to the sources. The figures are shown as reported in those source summaries and have not been independently verified for this report.

SOURCE GROUPS IN THE WORKBOOK

1

Research & Survey

Central Square Foundation and BaSE 2025 material on EdTech access, adoption, learning views and technology use.

2

Government Information

Press Information Bureau (PIB) release on consumer awareness and enforcement.

3

Regulatory Sources

Department of Consumer Affairs, CCPA annual report 2023-24 and the coaching-sector advertising guidelines.

4

Consumer Protection

CCPA website information on consumer complaints and complaint channels.

RESEARCH WORKFLOW

1

Find and summarise sources with AI help

2

Record source links in Excel

3

Organise 34 records into columns

4

Clean and group the data

5

PivotTables and Power BI

i

DATA QUALITY NOTE

Source links are recorded in the workbook. Before final submission, open the original documents and check the exact wording, dates and figures. AI-generated summaries should not be treated as primary evidence.

5. DATA PREPARATION IN EXCEL

The Excel workbook has four sheets. The raw records were kept as they were collected, then a cleaned copy was made, grouped into themes and summarised in PivotTables.

Sheet	Purpose
Research_Original_Data	The 34 records as first collected, with all 12 columns.
Clean_Dataset	Cleaned version of the same 34 records, loaded into Power BI.
Analysis_sheet	Category, description and analysis theme for each record.
Pivot_Analysis	Six PivotTables used to count and compare the records.

BEFORE: RESEARCH_ORIGINAL_DATA

Record_ID	Date	Source_Platform	EdTech_Platform	Category	Description
1	Not Available	Central Square Foundation Report	Bharat Survey for EdTech (Base)	EdTech Usage and Survey Sample	Base 2025 Surveyed 15,000 respondents from low-resourced settings, including 12,500 households and 2,500 teachers. Respondents included parents, children and teachers in Grades 1-12 across Government and Private schools.
2	20-02-18	Central Square Foundation - Base	Indian EdTech Ecosystem	Technology Access and AI Awareness	The Base 2025 Study Examines Access To Technology, Use Of EdTech For Teaching And Learning, User Sentiment, And Awareness And Use Of AI In Education.
3	Not Available	Central Square Foundation Report	Indian EdTech Ecosystem	Perceived Learning Benefits	The Base 2025 Report Article States That 75% Of Children And Parents Surveyed Feel EdTech Boosts Learning.
4	Not Available	Central Square Foundation Report	Indian EdTech Ecosystem	Parent Support	The Base 2025 Report Article States That 90% Of Parents Surveyed Feel EdTech Helps Them Better Support Their Child's Learning.
5	Not Available	Central Square Foundation Report	Indian EdTech Ecosystem	Teacher Experience	The Base 2025 Report Article States That 81% Of Teachers Surveyed Feel EdTech Improves Learning Outcomes And 96% Feel It Saves Time.
6	Not Available	Central Square Foundation Report	Indian EdTech Ecosystem	Digital Learning Risks	The Base 2025 Report Article States That 60% Of Children Using EdTech Believe Its Use Carries Risks, And About Two-Thirds Reported Experiencing At Least One Risk In The Previous 12 Months.
7	Not Available	Press Information Bureau	Indian EdTech Companies	Consumer Protection Advisory	The Government Advised Consumers To Verify EdTech Companies, Avoid Blindly Trusting Advertisements, Check Success Stories, Understand Payment Terms And Be Cautious About Loans And Offers.
8	13-11-24	Press Information Bureau	Coaching Sector	Misleading Advertisement Enforcement	The CCA Reported Action Against 45 Coaching Centres And Penalties Totalling Rs 54.6 Lakh Against 18 Institutes For Misleading Advertisements.
9	13-11-24	Press Information Bureau	Coaching Sector	Student Refund Grievances	The Government Reported That Intervention Through The National Consumer Helpline Facilitated Refunds Totalling Rs 1.15 Crore For Affected Students Between September 2023 And August 2024.
10	13-11-24	Department of Consumer Affairs	Coaching Sector	False Success And Placement Claims	The 2024 Coaching Advertisement Guidelines Address Misleading Claims And Require Relevant Disclosures About Courses, Selections And Other Advertised Outcomes.
11	Not Available	CPA Annual Report 2023-24	BYJU'S IAS	Misleading Advertisement Case	The CPA Annual Report Describes Action Concerning Advertised Selection-Related Claims By BYJU'S IAS, Including A Direction To Discontinue The Advertisements And A Penalty.
12	Not Available	CPA Annual Report 2023-24	IDRA IAS	Misleading Advertisement Case	The CPA Annual Report Describes Action Concerning Advertised Selection-Related Claims By IDRA IAS, Including A Direction To Discontinue The Advertisements And A Penalty.
13	Not Available	Press Information Bureau	Indian Education Advertising	Advertising Compliance	The Government Reported That An ASCI Review Identified The Education Category As The Largest Violator Of The Advertising Code In 2021-22.
14	Not Available	Central Consumer Protection Authority	Indian Education Advertising	Consumer Grievances	The CCA Website Directs Individual Consumer Grievances To The National Consumer Helpline And Identifies Consumer Complaint Channels.
15	Not Available	Central Consumer Protection Authority	Indian Education Advertising	Advertising Compliance	The Government Reported That An ASCI Review Identified The Education Category As The Largest Violator Of The Advertising Code In 2021-22.
16	24-02-18	Central Square Foundation	Indian EdTech Ecosystem	Teacher Risk Perceptions	The Base 2025 Report Article States That 50% Of EdTech-Using Teachers Believe EdTech Poses Risks To Children, While 52% Believe It Poses Risks To Teachers.
17	24-02-18	Central Square Foundation	Indian EdTech Ecosystem	Smartphone Access	The Base 2025 Report Article States That 81% Of Children Surveyed Own One Or More Smartphones.
18	24-02-18	Central Square Foundation	Indian EdTech Ecosystem	Children's Smartphone Access	The Base 2025 Report Article States That 72% Of Children Access A Smartphone In Their Household.
19	24-02-18	Central Square Foundation	Indian EdTech Ecosystem	Internet Access	The Base 2025 Report Article States That 90% Of Children Report Internet Access While Using A Smartphone.
20	24-02-18	Central Square Foundation	Indian EdTech Ecosystem	Smartphone Usage Duration	The Base 2025 Report Article States That 84% Of Children Spend More Than 30 Minutes On A Smartphone On A Typical Day.
21	24-02-18	Central Square Foundation	Indian EdTech Ecosystem	EdTech Adoption Among Children	The Base 2025 Report Article States That 60% Of Children Surveyed Report Using EdTech.
22	24-02-18	Central Square Foundation	Indian EdTech Ecosystem	EdTech Adoption Among Teachers	The Base 2025 Report Article States That 87% Of Teachers Surveyed Report Using EdTech.
23	24-02-18	Central Square Foundation	Indian EdTech Ecosystem	Specialised EdTech App Usage	The Base 2025 Report Article States That Only 6% Of Children Use Specialised EdTech Apps; Many Use Youtube, Whatsapp And Google Search For Learning.
24	24-02-18	Central Square Foundation	Indian EdTech Ecosystem	Generative AI Adoption	The Base 2025 Report Article States That 51% Of EdTech-Using Teachers Use GenAI And 35% Of EdTech-Using Children Use GenAI For Learning.
25	2025	Central Square Foundation	Base Null	Research Sample	Survey Covers Parents Children And Teachers From Low-Income Backgrounds In India
26	2025	Central Square Foundation	Base Null	Research Sample	The Survey Included 15000 Respondents From Low-Resourced Settings
27	2025	Central Square Foundation	Base Null	Research Sample	The Survey Included 12500 Households
28	2025	Central Square Foundation	Base Null	Access To Technology	The Survey Included 2500 Teachers
29	2025	Central Square Foundation	Base Null	Teacher Device Access	Survey Examines Availability Of Smartphones Internet And Other Technology For Learning
30	2025	Central Square Foundation	Base Null	Teacher Device Access	Survey Report Indicates 44 Percent Of Teachers Have Access To Smart Classroom Devices
31	2025	Central Square Foundation	Base Null	Teacher Device Access	Survey Report Indicates 38 Percent Of Teachers Have Access To A Laptop Or Desktop
32	2025	Central Square Foundation	Base Null	Teacher Device Access	Survey Report Indicates 29 Percent Of Teachers Have Access To A Tablet
33	2025	Central Square Foundation	Base Null	EdTech Awareness	Survey Report Indicates 98 Percent Of Teachers Are Aware Of EdTech
34	2025	Central Square Foundation	Base Null	EdTech Usage	Survey Report Indicates 88 Percent Of Teachers Use EdTech
35	2025	Central Square Foundation	Base Null	EdTech Usage	Survey Report Indicates 12 Percent Of Teachers Do Not Use EdTech

The original sheet: dates show "Not Available" and text is written as collected.

AFTER: CLEAN DATASET

B11	Date	Source_Platform	EdTech_Platform	Category	Description
1	Null	Central Square Foundation Report	Bharat Survey for EdTech (Base)	EdTech Usage and Survey Sample	Base 2025 Surveyed 15,000 Respondents From Low-Resourced Settings, Including 12,500 Households And 2,500 Teachers. Respondents Included Parents, Children And Teachers In Grades 1-12 Across Government And Private Schools.
2	20-02-18	Central Square Foundation - Base	Indian EdTech Ecosystem	Technology Access And AI Awareness	The Base 2025 Study Examines Access To Technology, Use Of EdTech For Teaching And Learning, User Sentiment, And Awareness And Use Of AI In Education.

35	2025	Central Square Foundation	Base Null	EdTech Usage	Survey Report Indicates 12 Percent Of Teachers Do Not Use EdTech

The cleaned sheet: same 34 records, text formatted consistently and missing dates marked "Null".

6. CLEANING & GROUPING THE DATA

WHAT WAS DONE TO THE DATA

- All 34 records were kept. No rows were removed, so both sheets have 34 records.
- Dates written as "Not Available" were changed to "Null" in the clean sheet. 11 of the 34 records have no date.
- Text columns such as source, platform, category, description and notes were formatted in the same way (each word starting with a capital letter). Because of this, names such as BYJU's IAS and ASCI appear as "Byju'S Ias" and "Asci" in the clean sheet.
- Percentages in the Quantitative_Metric column are stored as numbers such as 0.75 (75%) in some records.
- In the EdTech_Platform column, 11 records are labelled "Base Null". These are the BaSE 2025 survey records (the original sheet shows "BaSE 2025" for them).

GROUPING INTO ANALYSIS THEMES

The Analysis_sheet gives each record a short category, a description and one of six analysis themes. This made it possible to count records by theme in a PivotTable.

Category	Description	Analysis
Edtech Usage And Survey Sample	Base 2025 Surveyed 15,000 Respondents From Low-Resourced Settings, Including 12,500 Households And 2,500 Teachers. Respondents Included Parents, Children And Teachers In Grades 1-12 Across Government And Affordable Private Education.	Research Scope & Sample
Technology Access And Ai Awareness	The Base 2025 Study Examines Access To Technology, Use Of Edtech For Teaching And Learning, User Sentiment, And Awareness And Use Of Ai In Education.	Access & Infrastructure
Perceived Learning Benefits	The Base 2025 Report Article States That 75% Of Children And Parents Surveyed Feel Edtech Boosts Learning.	Benefits & Experience
Parent Support	The Base 2025 Report Article States That 95% Of Parents Surveyed Feel Edtech Helps Them Better Support Their Child's Learning.	Benefits & Experience
Teacher Experience	The Base 2025 Report Article States That 81% Of Teachers Surveyed Feel Edtech Improves Learning Outcomes And 96% Feel It Saves Time.	Benefits & Experience
Digital Learning Risks	The Base 2025 Report Article States That 60% Of Children Using Edtech Believe Its Use Carries Risks, And About Two-Thirds Reported Experiencing At Least One Risk In The Previous 12 Months.	Risk & Consumer Protection
Consumer Protection Advisory	The Government Advised Consumers To Verify Edtech Companies, Avoid Blindly Trusting Advertisements, Check Success Stories, Understand Payment Terms And Be Cautious About Loans And Personal Data.	Risk & Consumer Protection
Misleading Advertisement Enforcement	The Cpa Reported Action Against 45 Coaching Centres And Penalties Totalling Rs 54.6 Lakh Against 18 Institutes For Misleading Advertisements.	Risk & Consumer Protection
Student Refund Grievances	The Government Reported That Intervention Through The National Consumer Helpline Facilitated Refunds Totalling Rs 1.15 Crore For Affected Students Between September 2023 And August 2024.	Risk & Consumer Protection
False Success And Placement Claims	The 2024 Coaching Advertisement Guidelines Address Misleading Claims And Require Relevant Disclosures About Courses, Selections And Other Advertised Outcomes.	Risk & Consumer Protection
Misleading Advertisement Case	The Cpa Annual Report Describes Action Concerning Advertised Selection-Related Claims By Byju's Ias, Including A Direction To Discontinue The Advertisements And A Penalty.	Risk & Consumer Protection
Misleading Advertisement Case	The Cpa Annual Report Describes Action Concerning Advertising Claims By Iqra Ias, Including A Direction To Discontinue The Advertisements And A Penalty.	Risk & Consumer Protection
Advertising Compliance	The Government Reported That An Asci Review Identified The Education Category As The Largest Violator Of The Advertising Code In 2021-22.	Risk & Consumer Protection
Complaint Reporting Channel	The Cpa Website Directs Individual Consumer Grievances To The National Consumer Helpline And Identifies Consumer Complaint Channels.	Risk & Consumer Protection
Teacher Risk Perceptions	The Base 2025 Report Article States That 59% Of Edtech-Using Teachers Believe Edtech Poses Risks To Children, While 52% Believe It Poses Risks To Teachers.	Risk & Consumer Protection
Smartphone Access	The Base 2025 Report Article States That 90% Of Surveyed Households Own One Or More Smartphones.	Access & Infrastructure
Children's Smartphone Access	The Base 2025 Report Article States That 72% Of Children Access A Smartphone In Their Household.	Access & Infrastructure
Internet Access	The Base 2025 Report Article States That 99% Of Children Report Internet Access While Using A Smartphone.	Access & Infrastructure
Smartphone Usage Duration	The Base 2025 Report Article States That 84% Of Children Spend More Than 30 Minutes On A Smartphone On A Typical Day.	Access & Infrastructure
Edtech Adoption Among Children	The Base 2025 Report Article States That 63% Of Children Surveyed Report Using Edtech.	EdTech Adoption & Usage
Edtech Adoption Among Teachers	The Base 2025 Report Article States That 87% Of Teachers Surveyed Report Using Edtech.	EdTech Adoption & Usage
Specialised Edtech App Usage	The Base 2025 Report Article States That Only 6% Of Children Use Specialised Edtech Apps, Many Use Youtube, Whatsapp And Google Search For Learning.	EdTech Adoption & Usage
Generative Ai Adoption	The Base 2025 Report Article States That 53% Of Edtech-Using Teachers Use Generai And 33% Of Edtech-Using Children Use Generai For Learning.	AI & Technology
Survey Coverage	Survey Covers Parents Children And Teachers From Low-Income Backgrounds In India	Research Scope & Sample
Research Sample	The Survey Included 15000 Respondents From Low-Resourced Settings	Research Scope & Sample
Research Sample	The Survey Included 12500 Households	Research Scope & Sample
Research Sample	The Survey Included 2500 Teachers	Research Scope & Sample
Access To Technology	Survey Examines Availability Of Smartphones Internet And Other Technology For Learning	Access & Infrastructure
Teacher Device Access	Survey Report Indicates 44 Percent Of Teachers Have Access To Smart Classroom Devices	Access & Infrastructure
Teacher Device Access	Survey Report Indicates 34 Percent Of Teachers Have Access To A Laptop Or Desktop	Access & Infrastructure
Teacher Device Access	Survey Report Indicates 29 Percent Of Teachers Have Access To A Tablet	Access & Infrastructure
Edtech Awareness	Survey Report Indicates 98 Percent Of Teachers Are Aware Of Edtech	AI & Technology
Edtech Usage	Survey Report Indicates 88 Percent Of Teachers Use Edtech	EdTech Adoption & Usage
Edtech Usage	Survey Report Indicates 12 Percent Of Teachers Do Not Use Edtech	EdTech Adoption & Usage

Analysis_sheet: category, description and analysis theme for each record.

Analysis theme	Records
Risk & Consumer Protection	10
Access & Infrastructure	9
Research Scope & Sample	5
EdTech Adoption & Usage	5
Benefits & Experience	3
AI & Technology	2

7. PIVOT ANALYSIS

The Pivot_Analysis sheet has six PivotTables. Each one counts the 34 records in a different way, so the total in every table is 34.

Sentiment_Basis		Evidence_Basis		Category_&_Description_Analysis	
Row Labels	Count of Record_ID	Row Labels	Count of Record_ID	Row Labels	Count of Category
Neutral	25	Published Research Report	14	Risk & Consumer Protection	10
Positive	7	Official Source	11	Access & Infrastructure	9
Negative	2	Official Regulator Annual Report	2	Research Scope & Sample	5
Grand Total	34	Official Consumer Protection Website	1	EdTech Adoption & Usage	5
		Official Guidelines	1	Benefits & Experience	3
		Government Report Citing Asci	1	AI & Technology	2
		Published Survey Report	1	Grand Total	34
		Official Government Enforcement Report	1		
		Government Advisory	1		
		Official Government Report	1		
		Grand Total	34		

Date_Basis		Source_Platform_Analysis		EdTech_Platform_Analysis	
Row Labels	Count of Record_ID	Row Labels	Count of Record_ID	Row Labels	Count of Record_ID
2025	11	Central Square Foundation	19	Indian Edtech Ecosystem	14
Null	11	Central Square Foundation Report	6	Base Null	11
24-02-26	8	Press Information Bureau	4	Coaching Sector	3
13-11-24	3	Ccpa Annual Report 2023-24	2	Byju's Ias	1
20-02-26	1	Department Of Consumer Affairs	1	Iqra Ias	1
Grand Total	34	Central Consumer Protection Authority	1	Indian Education Advertising	1
		Central Square Foundation - Base Report	1	Bharat Survey For Edtech (Base) Null	1
		Grand Total	34	Indian Edtech Companies	1
				Consumer Grievances	1
				Grand Total	34

Pivot_Analysis sheet in Excel.

WHAT THE PIVOTTABLES SHOW

PivotTable	Main result
Sentiment_Basis	25 Neutral, 7 Positive, 2 Negative records
Evidence_Basis	14 Published Research Reports and 11 Official Sources; the rest are single records of other official types
Category_&_Description_Analysis	Risk & Consumer Protection 10, Access & Infrastructure 9, Research Scope & Sample 5, EdTech Adoption & Usage 5, Benefits & Experience 3, AI & Technology 2
Date_Basis	11 records dated 2025, 11 with no date, 8 dated 24-02-26, 3 dated 13-11-24 and 1 dated 20-02-26
Source_Platform_Analysis	Central Square Foundation appears under three labels (19 + 6 + 1 = 26 records); PIB 4, CCPA Annual Report 2 and 2 single-record sources
EdTech_Platform_Analysis	Indian Edtech Ecosystem 14, Base Null 11, Coaching Sector 3, and single records for other topics

8. ACCESS, ADOPTION & AI

These figures come from the BaSE 2025 survey of 15,000 respondents from low-resourced settings (12,500 households and 2,500 teachers, in 10 states). The survey covers parents, children and teachers in Grades 1-12 in government and affordable private schools.

ACCESS TO DEVICES AND INTERNET

90%

of households own one or more smartphones

72%

of children access a smartphone in their household

99%

of children report internet access while using a smartphone

84%

of children spend more than 30 minutes on a smartphone on a typical day

TEACHERS WITH ACCESS TO DEVICES

Smart classroom devices

Laptop or desktop

Tablet

AWARENESS AND USE OF EDTECH

Teachers aware of EdTech

Teachers who use EdTech

Children who use EdTech

Children using specialised EdTech apps

12% of teachers do not use EdTech. Many children learn through YouTube, WhatsApp and Google Search instead of specialised apps.

GENERATIVE AI IN LEARNING

51%

of EdTech-using teachers use GenAI

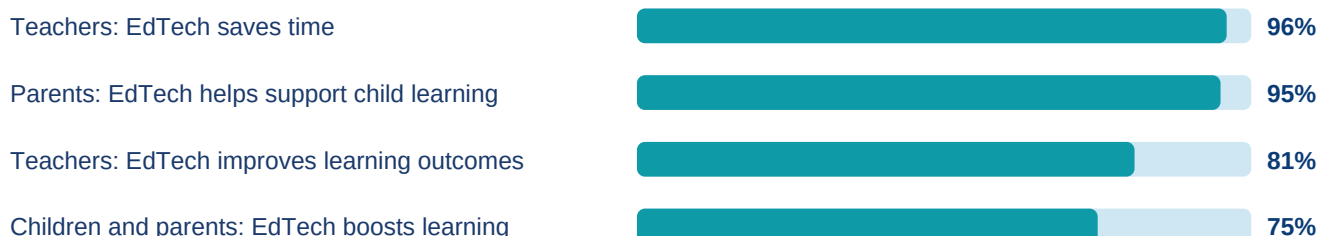

35%

of EdTech-using children use GenAI for learning

Note: access to a smartphone in the household does not always mean the child owns one. Awareness of EdTech does not always mean regular use. The GenAI figures are only for those who use EdTech.

9. BENEFITS, RISKS & PROTECTION

WHAT RESPONDENTS FEEL ABOUT BENEFITS

These are opinions shared by survey respondents. They are not test results of learning.

WHAT RESPONDENTS FEEL ABOUT RISKS

WHAT THE REGULATORS REPORTED

Misleading advertisements

CCPA reported action against 45 coaching centres, with penalties of Rs 54.6 lakh in total against 18 institutes.

Student refunds

The National Consumer Helpline helped students get refunds of Rs 1.15 crore between September 2023 and August 2024.

CCPA annual report cases

Cases on advertised selection claims: BYJU's IAS (Rs 10 lakh penalty) and IQRA IAS (Rs 1 lakh penalty), with a direction to stop the advertisements.

Advertising compliance

An ASCI review, as reported by the Government, found Education to be the largest violator category of the advertising code in 2021-22.

Advice given to consumers: verify the EdTech company, do not blindly trust advertisements, check success stories, understand payment terms and be careful with loans and personal data. Complaints can be made to the National Consumer Helpline.

The enforcement figures cover the wider coaching sector, not only online EdTech, and are not a count of all complaints in India.

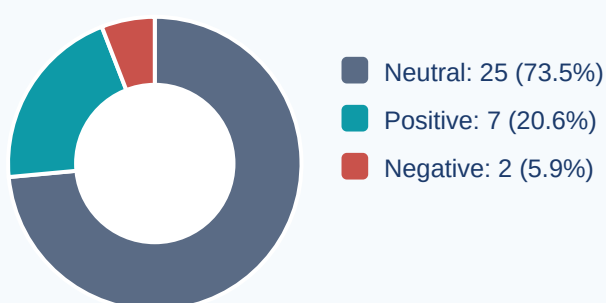

10. POWER BI DASHBOARD

The Analysis Dashboard in Power BI shows the main results in one view. It uses the Clean_Dataset and Analysis_sheet tables. Below is a summary of its six visuals.

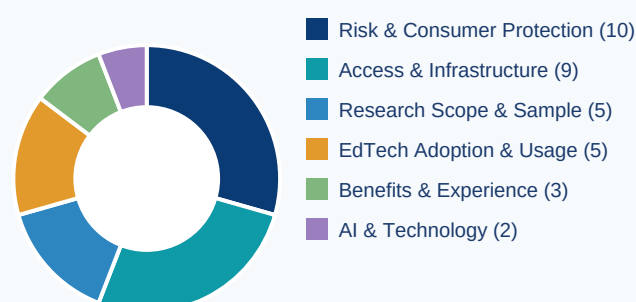

34 Total Evidence Records

10 Risk Consumer Protection Records

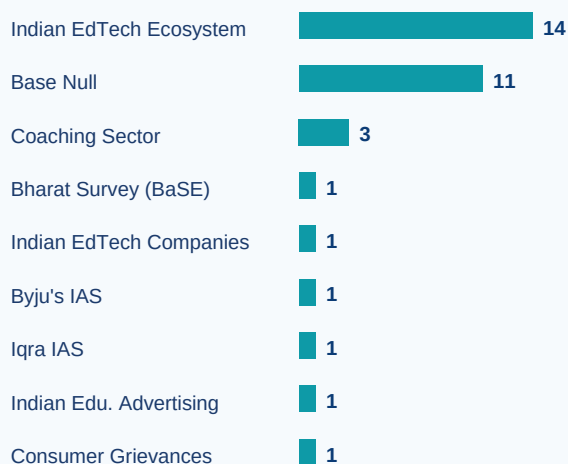

Sentiment Distribution

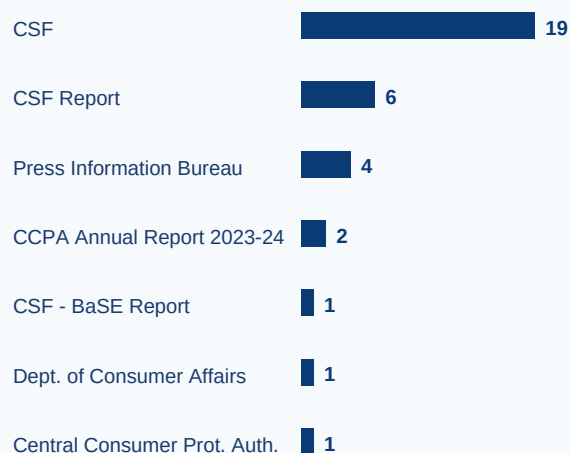

Category & Description Analysis

EdTech Platform Distribution

Source Platform Distribution

CSF = Central Square Foundation. The charts use the same 34 records as the Excel PivotTables, so the counts match.

11. KEY INSIGHTS & LIMITATIONS

KEY INSIGHTS

1. Access is high, but uneven

90% of households own a smartphone, but only 44% of teachers have smart classroom devices, 34% a laptop or desktop and 29% a tablet.

2. Teachers are ahead of children in use

98% of teachers know about EdTech and 88% use it, while 63% of children report using it.

3. Children learn through general apps

Only 6% of children use specialised EdTech apps. Many use YouTube, WhatsApp and Google Search for learning.

4. Benefits and worries go together

Perceived benefits are high (75% to 96%), yet 60% of children and 59% of teachers also see risks.

5. Most evidence is descriptive

25 of the 34 records are Neutral, 7 are Positive and 2 are Negative. Most records report facts or actions, not opinions.

6. Risk is the biggest theme

10 of the 34 records (29.4%) are about risk and consumer protection, more than any other theme.

LIMITATIONS

- The dataset has only 34 records, and 26 come from one source (Central Square Foundation). The findings are not for the whole Indian EdTech market.
- The figures are shown as reported in the source summaries. They were not checked independently.
- Most figures are opinions or reported experiences, not measured results.
- 11 records have no date. The enforcement data covers the wider coaching sector.
- AI was used to help find and summarise sources, so the original documents should be checked before the figures are quoted.

12. CONCLUSION & RECOMMENDATIONS

This project put 34 research records on the Indian EdTech landscape in order and studied them with Excel, Power Query and Power BI. The records show good access to smartphones and the internet, wide use of EdTech among teachers, and strong positive opinions from parents and teachers. They also show that many respondents see risks, and that regulators have acted on misleading advertisements and student complaints.

RECOMMENDATIONS BASED ON THE FINDINGS

01

Check before you enrol

Parents and students should verify the company, check success claims and understand payment terms before paying.

02

Improve device access for teachers

Only 29% to 44% of teachers have access to each device type, so better access could help them use EdTech more.

03

Reach children with learning-focused apps

As only 6% of children use specialised apps, quality learning tools need to reach them better.

04

Keep advertising checks in place

The advertising guidelines and complaint channels help protect students from misleading claims.

05

Add more sources

More sources and confirmed dates would give a wider and more reliable picture.
